

FORQUANTIQ

ISO/IEC 27001 · ISO 9001 · ISO 22301

ISO consulting and assurance

Ten products to prepare, internally audit and demonstrate the trustworthiness of your management system. Scope, timeline and deliverables are defined from the proposal.

Where is your company today?

Products with a defined scope and tangible results, to demonstrate trust to clients, regulators and audits. Choose your starting point.

My company is not certified yet

A client or management asks for evidence, and you need to know where to start.

Trust Radar

Executive risk and compliance assessment

Trust Dossier

Security evidence for demanding clients

Crisis Tabletop

Executive crisis management exercise

Safe Monday

BIA and minimum viable continuity plan

Digital Resilience

Technology security and continuity

My company is already certified

Audit, follow up and reach the external audit without surprises.

Flash Check

Express internal audit

Focused Audit

Audit by risk or critical topic

Dress Rehearsal

External audit simulation

Quarterly Pulse

Compliance and action follow-up

Annual Cycle

Annual assurance program

Defined scope

Agreed in the proposal, before work begins.

Tangible result

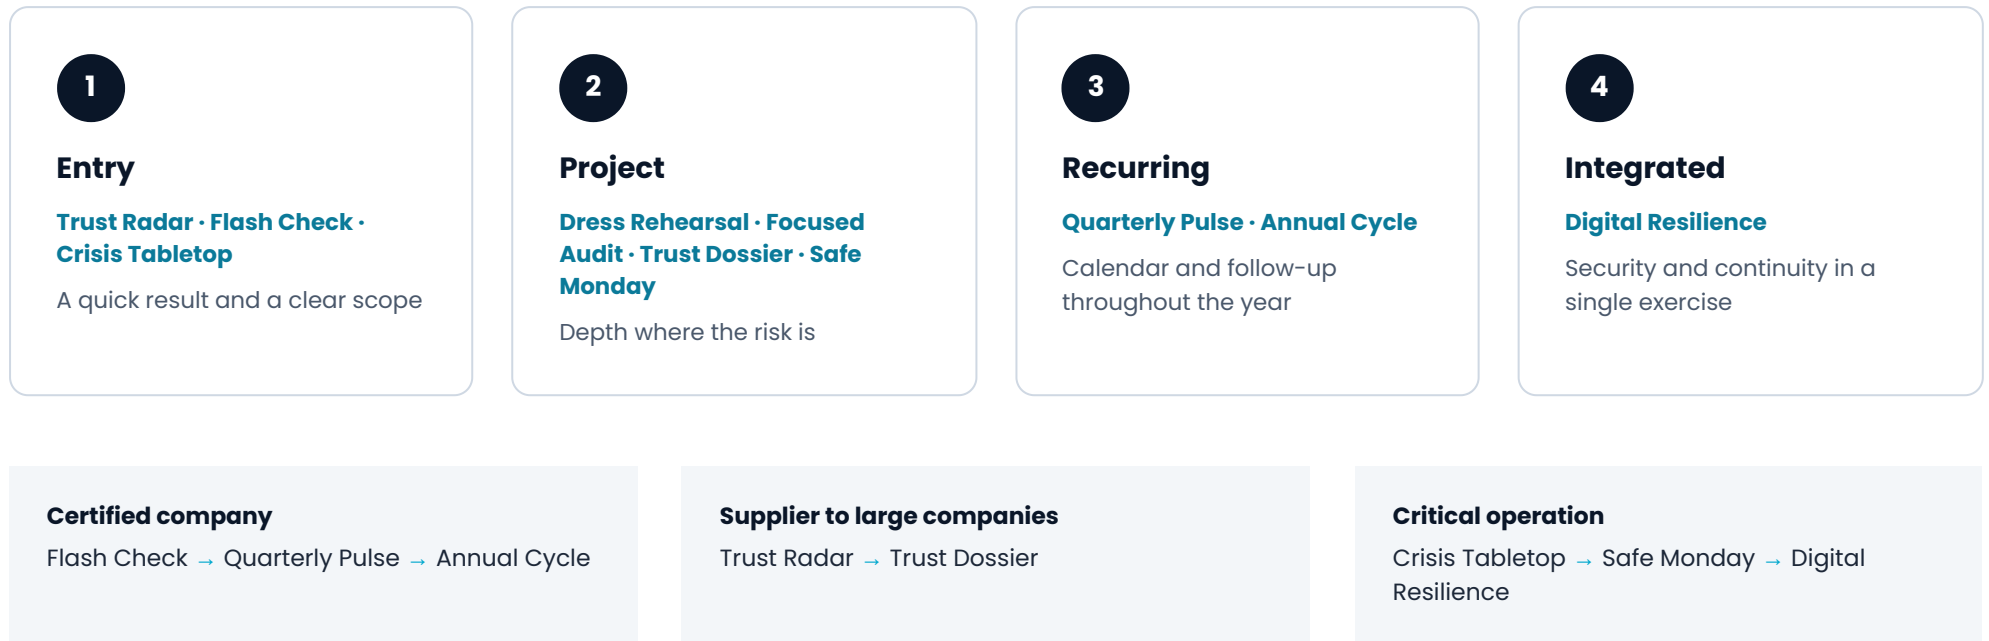

Report, action plan and results meeting.

Clear schedule

Days, not months; with an option for recurring follow-up.

How you grow with FORQUANTIQ

Start with an entry product. If it creates value, move on to the next one; nothing is mandatory.

27001

ENTRY

Trust Radar

Executive risk and compliance assessment

We identify the security gaps that hold back your sales the most and prioritize actions to reduce risk.

WHAT DO WE SOLVE?

A corporate client asks for security evidence and the company doesn't know where it stands or where to start.

TIMELINE

3 days

IDEAL FOR

Companies that sell to large corporations

WHAT YOU RECEIVE

- Maturity score by Annex A domain
- The 10 gaps that most hold back sales or audits
- 90-day roadmap with owners
- Executive results meeting

Natural next step Includes a semi-annual re-assessment and leads to Trust Dossier or Quarterly Pulse.

27001

9001

22301

ENTRY

Flash Check

Express internal audit

A fixed-scope audit: clear findings and an action plan to meet your annual requirement.

WHAT DO WE SOLVE?

A certified company must audit itself every year and leaves it to the last minute, or it is done by someone who isn't independent.

TIMELINE

2 days

IDEAL FOR

Certified companies

WHAT YOU RECEIVE

- Fixed plan and scope: 1 standard, critical processes
- 2 days of audit, remote or on-site
- Report with classified findings and evidence
- Suggested action plan

Natural next step Repeats every year and leads to Quarterly Pulse and Annual Cycle.

22301

ENTRY

Crisis Tabletop

Executive crisis management exercise

Test your crisis committee in a 4-hour session and walk away with the 5 most urgent improvements.

WHAT DO WE SOLVE?

Leadership has a written plan it has never tested; in a real crisis nobody knows who decides what.

TIMELINE

2 days

IDEAL FOR

Management teams with an untested plan

WHAT YOU RECEIVE

- Tailored scenario: ransomware, supplier outage, inaccessible site
- 4-hour session with the crisis committee
- Report on gaps and slow decisions
- Improvement plan with 5 prioritized actions

Natural next step Annual exercise with a new scenario; leads to Safe Monday.

27001

9001

22301

CORE

Dress Rehearsal

External audit simulation

We simulate your audit so nonconformities show up here and not on audit day.

WHAT DO WE SOLVE?

A major nonconformity in the external audit can cost you the certificate or a contract.

TIMELINE

4 days

IDEAL FOR

Companies with an upcoming audit

WHAT YOU RECEIVE

- Simulated audit using the certification body's criteria
- Findings report with severity levels
- Preparation session for the audited team
- Closure verification at 30 days

Natural next step Repeats every year before the surveillance audit and leads to the Annual Cycle.

27001

9001

22301

CORE

Focused Audit

Audit by risk or critical topic

Audit only where the risk is: access, suppliers, backups or critical processes.

WHAT DO WE SOLVE?

Full audits are long and expensive, and the real risk sits in 2 or 3 areas: access, suppliers, backups or critical processes.

TIMELINE

3 days

IDEAL FOR

Certified companies

WHAT YOU RECEIVE

- Topic selection based on risk and previous findings
- 3-day audit of the controls and processes for the topic
- Report with evidence and priorities
- Corrective recommendations

Natural next step Topics rotate every year, with 2 to 4 audits per program.

27001

CORE

Trust Dossier

Security evidence for demanding clients

Brings together the policies, controls and answers your clients ask for, so you can respond to questionnaires in days, not weeks.

WHAT DO WE SOLVE?

A large or regulated client requires a security assessment of its suppliers, and each questionnaire takes weeks.

TIMELINE

4 days

IDEAL FOR

Suppliers to large or regulated companies

WHAT YOU RECEIVE

- Minimum policies and controls
- Risk matrix and simplified Statement of Applicability (SoA)
- Library of questionnaire answers
- Evidence folder ready to share

Natural next step Monthly maintenance: updates and answers to new questionnaires.

22301

CORE

Safe Monday

BIA and minimum viable continuity plan

Know what is critical, how long it can be down and how to resume operations with a plan that gets tested.

WHAT DO WE SOLVE?

If the system, the site or a critical supplier fails, operations stop and nobody knows what to recover first.

TIMELINE

4 days

IDEAL FOR

Critical operations

WHAT YOU RECEIVE

- Business impact analysis (BIA) with RTO and RPO
- Continuity strategies per critical process
- Minimum viable plan and crisis tree
- One test exercise

Natural next step Annual continuity program, with quarterly follow-up.

27001

9001

22301

RECURRING

Quarterly Pulse

Compliance and action follow-up

Every quarter we review indicators, risks and actions so you reach the audit without surprises.

WHAT DO WE SOLVE?

Between audits, findings go cold, actions expire and the surprise arrives on external audit day.

TIMELINE

Every quarter

IDEAL FOR

Certified companies

WHAT YOU RECEIVE

- Review of indicators, risks and evidence
- Follow-up and closure of corrective actions
- Traffic-light view of system compliance
- 60-minute meeting with the system owner

Natural next step It is the recurring service itself; scales up to Annual Cycle.

27001

9001

22301

ADVANCED

Annual Cycle

Annual assurance program

One contract for the whole year: internal audit, follow-up, management review and dashboard.

WHAT DO WE SOLVE?

Certified companies handle audit, follow-up and management review as separate tasks, almost always against the clock.

TIMELINE

12 months

IDEAL FOR

Companies with one or more standards

WHAT YOU RECEIVE

- Annual audit program
- 1 full internal audit
- 3 Quarterly Pulses
- Management review ready and annual effectiveness report

Natural next step Annual renewal; keeps the client covered for audit, follow-up and management review under a single contract.

27001

22301

ADVANCED

Digital Resilience

Technology security and continuity

Prepare your company for a ransomware attack or a critical outage: priorities, response, recovery and a real test.

WHAT DO WE SOLVE?

A ransomware attack or a platform outage stops operations and nobody knows who decides, what gets recovered first or whether backups work.

TIMELINE

5 days

IDEAL FOR

Critical digital operations

WHAT YOU RECEIVE

- BIA and digital dependency map
- Incident response and recovery plan
- Backup restoration test
- Executive drill

Natural next step Semi-annual test and continuity program.

Frequently asked questions

Does FORQUANTIQ certify my company?

No. Certification is granted by an accredited body of your choice. FORQUANTIQ prepares you, audits internally and simulates audits so your company arrives better prepared.

Can I hire one product without the others?

Yes. Each product is sold separately; the suggested next steps are optional.

Do you work remotely or on-site?

Depending on the product: for example, the Flash Check can be done remotely or on-site. It is defined in the proposal.

How is the fee for each product defined?

Each proposal defines scope, timeline, deliverables and fee before work begins. Any scope extension is agreed in writing before it is carried out.

Do I need Secure Web 360?

No. The consulting products are independent. Continuous monitoring of your website is an optional add-on.

When do we start?

Once the proposal is approved, we agree on the start date and who your point of contact will be.

Where is your company today?

Tell us your situation and we will propose a starting point. We reply within 24 business hours.
